## **INTRODUCTION**

This report contains information gathered in the 2011 Isle of Man Census, which was held on 27<sup>th</sup> / 28<sup>th</sup> March 2011. It is the most recent in a series dating back to 1821. A full Census is held every ten years and is a comprehensive survey of people and households in the Island.

The 2011 Census was conducted by the Economic Affairs Division of the Treasury under the authority of the Census Act 1929.

This publication is available via the Internet at [www.gov.im/treasury/economic/census](http://www.gov.im/treasury/economic/census).

Should any further analysis be required a written request should be submitted to the address below and we will endeavour to provide any such figures, subject to practicality (including resource requirement) and confidentiality.

## **GENERAL EXPLANATORY NOTES**

The following definitions relate to the headings used in the Census tables and to concepts underlying the Census analysis.

### **Population Base**

The primary purpose of taking a Census is to gather information on the Island's resident population. To facilitate historical comparisons it is traditional to also examine the figure for the Census population as shown in the historical data section of this report. There is also the *de facto* population, defined as the number of people actually in the Island on Census Night. The following are the various population definitions used in this report:

Resident Population:	Isle of Man residents present on Census Night plus residents absent from the Island on Census Night
Census Population:	Resident population plus visitors in the Island on Census Night
<i>De Facto</i> Population:	Residents present on Census Night plus visitors in the Island on Census Night

### **Visitors**

For Census purposes a visitor is defined as a person whose usual place of residence is outside the Isle of Man. This includes persons who are visiting the Island on holiday and those on business who are here to work for a temporary period but who do not intend to take up residence in the Island in the immediate future.

### **Resident Households**

A household comprises of either one person living alone or a group of persons (who may or may not be related) living at the same address with common housekeeping which includes, for example, sharing one meal a day together.

The statistics presented on resident households exclude persons in communal establishments.

### **Census Districts/Enumeration Districts**

Each of the Island's 24 towns, villages and parishes comprises a Census district. An enumeration district covers the area of work of a particular enumerator. Heavily populated areas will therefore contain many enumeration districts (Douglas has 38). For Census purposes, the Calf of Man is part of the district of Rushen.

### **Dependency Ratio**

The dependency ratio is the number of people under 16 years old and the number of retirement age as a percentage of the working age population. Those of retirement age are taken to be all women 60 years and older and all men 65 years and older. The working age group consists of all adults above the age of 15 and under the age of 60 for women and 65 for men.

### **Place of Birth and Previous Residency**

For tables relating to place of birth and residency many countries have been grouped together. The groupings are shown in Appendix 2.

### **Employed/Economically Active**

Statistics on the employed population refer to the number of those in the resident population employed at the time of the Census. The economically active population is comprised of the employed population and the unemployed who are of working age (males aged between 16 and 65 and females aged between 16 and 60) and either seeking work or waiting to start work already obtained.

### **Occupation**

Information on employment by occupation relates to the main occupation of persons in employment or self-employment. The person's description of the tasks undertaken in their occupation was used to assign him/her to an occupational group. The classification system used is the UK Standard Occupational Classification 2010 (SOC2010). As there has been a major revision to the classification system used for coding the results of the 2006 Census (which used the previous "SOC2000" classification system), results are not directly comparable. Most noticeably, the revision has resulted in a large increase in the "Professional Occupations" category and a corresponding fall in the "Managers and Senior Officials" category.

To make the results detailed but readily interpretable, Table 3.9 of this report presents full or "sub-group" occupational details whereas Tables 3.10 to 3.13 present results by broad "major" group.

### **Industry**

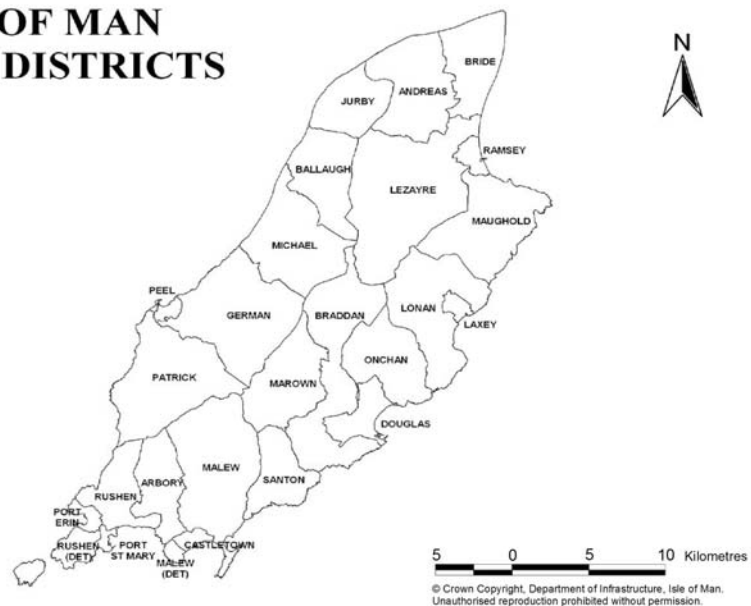

Information on employment by industry relates to the main business of the organisation in which individuals are employed or self-employed. The person's description of their or their employer's business was used to assign him/her to an industrial sector. As a result, a degree of judgement is built into the process of allocating individuals to industries and this should be borne in mind when interpreting results, particularly if making inter-censal comparisons.

## **EXECUTIVE SUMMARY**

- On Census Night 2011 the resident population stood at 84,497. This represents an increase of 5.5% on the 80,058 recorded in the 2006 Census.
- At 19.0%, the rate of growth of the population of Peel was faster over the last five years than that of any of the Island's other towns or villages. Douglas grew at a higher than average rate of 6.5%. Of the other towns, the population of Ramsey rose by 6.8% whilst that of Castletown fell by 0.5%.
- Reflecting a continuing downward trend in average household size, growth in the number of households increased at a faster rate than total population. The number of private households increased by 6.6% between 2006 and 2011 compared to population growth of 5.5%. Average household size fell from 2.35 to 2.33 over the five year period.
- The economically active population increased to 44,609 in 2011, up from 41,793 in 2006. The number in employment rose to 43,134, leaving the number unemployed at 1,475.
- Males are more likely to be in full-time employment or self-employment than females, but females account for 78% of part-time workers.
- Over 60% of the economically inactive cited retirement as the reason for not being in or seeking work. The number of females out of work and not seeking work because they are looking after the home and family has been declining significantly in recent years, from 6,733 in 1991 to 2,934 in 2001. It rose slightly in 2006 but has now fallen to 2,657.
- Manx born residents account for 48.1 % of the resident population, a slight increase on the comparable figure of 47.6% in 2006. 7.5% of residents were born outside the British Isles/Eire, compared to 6.1% in 2006.
